APPLICATIONS ACCEPTED THROUGH **FRIDAY, NOVEMBER 02, 2018.**

WE ARE AN EQUAL OPPORTUNITY EMPLOYER.

Position Summary:

Responsible for the design, implementation and system execution of companywide computer information systems. These systems involve enterprise-wide multi-platform distributed computer applications. This position has full responsibility for system team management.

Essential Functions:

- Provide significant input to policies, practices, and projects involving production computer operations
- Establish a common understanding of workflow applications processes within multiple project environments
- Create documentation with regard to processes, change management requests, and incident resolutions
- Direct and assist DBA with design, creation, and maintenance of databases per project and application needs
- Direct and assist gathering and developing specifications/requirements for projects and applications as needed.
- Develop and maintain strong relationships with key process owners and subject matter experts in order to regularly review customer satisfaction, project priorities, service needs, process improvements, etc.
- Routine daily maintenance of existing sites and applications.
- Create, manage and attend project meetings with users.
- Take ownership of daily project needs and communications.
- Communicate project status and deliverables with managers and users.
- Use standard development tools (currently ASP.Net, C#, Angular, Python, Powershell scripting, T-SQL, HTML5, CSS3, etc.) per project needs.
- Manage project tasks, timelines, and communication.
- Other tasks as needed for successful project completion.
- May be required to work during emergency conditions.
- Regular attendance is required.
- Job performance must conform to all CWS policies and procedures.
- Specific knowledge of CWS Environmental Management System Policy and Procedures.
- If Operations-focused position:
 - Direct the analysis, design, and integration of new and existing information systems, commercial-off-the-shelf (COTS), and development software including but not limited to Cityworks CMMS and PLL, EAM CMMS, LIMS, WIMS, GraniteNet, ESRI GIS, PowerPlan/AMP, SharePoint, Neptune N_Sight, SCADA
- If Administrative-focused position:
 - Direct the analysis, design, and integration of new and existing information systems, commercial-off-the-shelf (COTS), and development software including but not limited to corporate ERP, Billing, CRM, general

- ledger, asset management, contracts, projects, and accounts receivable applications
- Work with key process owners to streamline, document, and improve existing and new processes leveraging our current ERP platform.
- Create and develop interfaces designed to integrate with implemented ERP
- Design, develop and execute data migration processes and integrations to legacy systems
- Design and develop SSRS or Crystal web based reports

Additional Duties

- Perform other related duties as assigned.

Physical Requirements, Activities, and Working Conditions

- Ability to operate a personal computer including keyboard and mouse.
- Ability to visually read computer monitor.
- Must be able to remain seated and operate a personal computer for extended periods of time.
- Ability to reach to a height of 5 feet for mounting of tape drives.
- Ability to maneuver and transport 35 lbs. to include a box of paper into a mainframe printer. Objects greater than 50 lbs require a two-person operation.
- Ability to type 40 words per minute.
- Ability to receive detailed information through oral communication, written definitions and examples.
- Ability to convey detailed information to co-workers and customers accurately and quickly.
- Ability to operate and maintain motor vehicles.

Education and Experience

- Ability to manage and develop complex projects independently.
